

## Log in

As a guest user

I want to log in to my profile

So that I can publish my academic resources and interact with the ones already available

## Wireframe

The wireframe is set against a light gray grid background. It is divided into two main sections: 'Login' on the left and 'Home' on the right. In the 'Login' section, there are three input fields: an 'Email' field containing 'jj@tistudent.com', a 'Password' field containing '\*\*\*\*\*', and an 'Enter' button below them. An arrow points from the 'Enter' button towards the 'Home' section. In the 'Home' section, the text 'Welcome JJ!' is displayed.

## Acceptance criteria

- A guest user can log in in to their profile with the login form by **email** and **password**
- After logging in the user is redirected to the homepage where the user will be welcomed by **username**

## Create resource

As a user

I want to post an academic resource

So that others can use it to study

**Wireframe: ->**

### Acceptance criteria

- A form to add a resource:
  - Title input (max 60 chars)
  - Description input (max 500 chars)
  - Radio input to select category
  - Dropdown menu to select subject
  - File upload
  - Thumbnail upload
- Everything except thumbnail is required
- The user has to be logged in
- After creating the resource, it is added to the resources overview

The wireframe shows a form for creating a resource. It is organized into several sections:

- Title:** A single-line text input field.
- Description:** A large multi-line text area.
- File:** A section with a 'Browse...' button and an 'Upload' button.
- Thumbnail:** A section with a 'Browse...' button and an 'Upload' button.
- Category:** Two radio button options: 'Summary' and 'Cheat sheet'.
- Subject:** A dropdown menu with the placeholder text 'Subject...'.
- Submit:** A large red button at the bottom labeled 'Submit'.

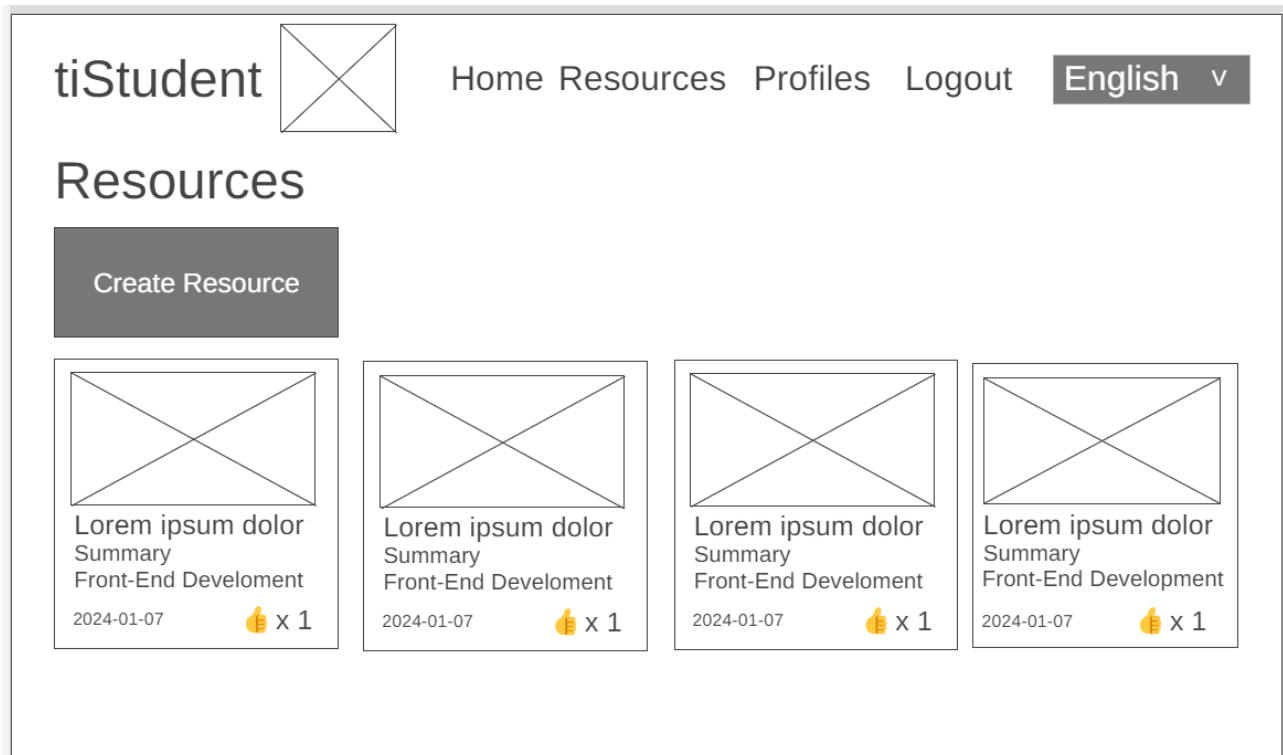

## Get resources

As a user

I want to get an overview of all resources

So that I can see which resources are available

### Wireframe

### Acceptance criteria

- Overview of all resources is displayed
- Resource - thumbnail, title, category, subject, createdAt are displayed
- Resource owner has the option to edit or delete the resource
- Admin has the option to edit or delete the resource
